## A Message from our Chairman

**Dr. K. T. Mahhe**  
Chairman Sreenidhi Educational Group

The environment in schools, colleges and the workplace is in a state of constant flux. Our students, when they graduate from our school, will face a landscape of increasing complexity and challenge. These challenges come from a variety of places, such as a globalized socio-economic terrain, a rapidly evolving technological environment, the challenges posed to their sense of values and ethics, and increasing competition. Today, I want to talk about one such challenge, being brought about by the emergence of AI, and especially programs like ChatGPT, for our students. Like all great changes, this presents both an opportunity and a threat. The emergence of artificial intelligence (AI) programs has been one of the most significant technological advancements of the 21st century. From self-driving cars to voice assistants, AI is already changing the way we interact with technology. One of the most exciting developments in this field is the rise of AI chat programs like Chat GPT, which are being used in business and education to streamline communication and improve efficiency. Businesses of all sizes are beginning to recognize the potential of AI chat programs like ChatGPT. These programs are designed to simulate human conversation, and they can be used to automate customer service, answer frequently asked questions, and even provide personalized product recommendations. This technology is particularly useful for businesses with high volumes of customer interactions, as it can reduce the workload on human employees and improve response times. For example, imagine a customer contacts a company with a question about a product. In the past, they would have had to wait on hold or send an email and wait for a response. With an AI chat program like ChatGPT, however, they can receive an instant response and continue with their day. This level of convenience and efficiency can greatly improve customer satisfaction and increase loyalty to a brand. In our field of education also, AI chat programs are making their mark, and are being used to enhance the learning experience. These programs can be used to answer student questions, provide personalized feedback, and even grade assignments. This technology can be particularly useful in online learning environments, where students may not have easy access to instructors or teaching assistants. For example, imagine a student who has a question about a topic covered in the course materials. Instead of waiting for their teacher to respond to an email or discussion forum post, they can simply ask an AI chat program like ChatGPT and receive an instant response. This level of support and accessibility can greatly enhance the learning experience for students and improve their chances of success. The emergence of AI chat programs like ChatGPT is also changing the job market. As these programs become more sophisticated, they have the potential to replace human workers in certain industries. This has led to concerns about job loss and the need for retraining programs to prepare workers for the changing job market. However, it is important to note that AI chat programs like ChatGPT are not intended to replace human workers entirely. These programs are designed to supplement human labor and improve efficiency, not replace it. In fact, many businesses are finding that AI chat programs can free up human employees to focus on more complex tasks that require critical thinking and problem-solving skills. Another benefit of AI chat programs like ChatGPT is that they can improve accessibility for individuals with disabilities. For example, individuals with visual impairments may have difficulty accessing traditional customer service channels like phone and email. With an AI chat program, however, they can communicate using text-based messages and receive the same level of support as any other customer. In conclusion, the emergence of AI chat programs like ChatGPT is changing the way we interact with technology in both business and education. These programs offer a level of convenience and efficiency that was previously impossible, and they have the potential to greatly improve customer satisfaction and enhance the learning experience. While there are concerns about job loss and the need for retraining programs, it is important to remember that AI chat programs are designed to supplement human labor, not replace it. As this technology continues to develop, we can expect to see even more innovative uses and applications in the years to come. It is time for us at Sreenidhi International School to rededicate ourselves to the idea AI is not just a barrier to surmount, but can be seen as an opportunity to separate ourselves from the pack. It is my belief that AI will become a part of SIS's DNA, and that we collectively possess the skills, the abilities and the will to make Sreenidhi International School the most distinct of schools, one from where students will emerge the best equipped to face the future.

## A Message from our ED

**Ssarithha Katikaneni**  
Managing Trustee & Executive Director

The aim of education must be, to prepare students beyond livelihood concerns. So value systems along with academics are of high significance. Values such as humility, responsible leadership, resilience, integrity, compassion, care for communities, etc., are indispensable across the globe to move towards sustainable, compassionate and transformational leadership.

As we celebrate 20 years of Sreenidhi international school , we have come long way and stronger in our outlook with the mission and vision of the school always at the core . As a community of learners and facilitators our goals are defined and we at Sreenidhi believe that a learner going out from this institution will be a proud global citizen with values and with a strong mind.

Values nurtured from a young age, help in building a strong character and personality leading to being a global citizen with respect to the cultures, embracing with compassion the differences and appreciating them. This will enable an enriching personality. At Sreenidhi we strive to have a learning environment to support this by giving various opportunities to the students in shaping them into internationally-minded learners

## A Message from our HOS

**Mr. Malcolm Nicolson**  
Head of School

It gives me great pleasure to wave cheerio and say 'au revoir' to a small, but beautifully formed, group of wonderful senior students. This is not goodbye, but 'see you later'. I have been lucky enough to have got to know many members of this cohort of students. The interests, skills, passions and contributions are as varied as they could possibly be, but each member has contributed to a group of students that now more resembles a group of siblings than a disparate group of students. They share bonds with each other and with their teachers that have guided them through joy, pain, struggles, successes and laughter. This group of senior students have defeated online learning, COVID, experiential challenges, exam preparation, student council elections, Fiestas, service learning, IAs, EEs, TOK and much more. We have champion athletes, top class academics, superb artists and compassionate, kind and caring young adults. Sreenidhi could not be more proud of this group, they are a credit to their families and the school in meeting our mission. They have been empowered to develop into the delightful young adults we see today. They will make a difference in the world whatever they choose to do, using the attributes, skills and knowledge learned with their wider family, at their second home, Sreenidhi International School. 'My Way' by Frank Sinatra sums up this group of students well, I'm sure they recognise the sentiments:

*"Yes, there were times I'm sure you knew*

*When I bit off more than I could chew*

*But through it all, when there was doubt*

*I ate it up and spit it out*

*I faced it all and I stood tall and did it my way"*

All the best and see you soon!

## A Message from our CEO

**General Mohan**  
Administration and Operations

Dear Young Adults,

“Serendipity is seeing what no one else sees and thinking what no one else has thought”  
Congratulations on reaching this significant milestone in your educational journey! As the CEO of Sreenidhi International School, I am immensely proud of each and every one of you for your dedication, perseverance, and unwavering spirit. As you step into the world beyond these hallways, I would like to offer you some encouraging words inspired by the wisdom of an Indian personality who left an indelible mark on history.

Renowned Indian statesman and visionary, Dr. APJ Abdul Kalam once said, “You have to dream before your dreams can come true” These profound words encapsulate the essence of leadership, resilience, and the pursuit of excellence. They remind us that greatness lies not in the absence of obstacles, but in our ability to rise above them.

Have the audacity to dream big, and then work tirelessly to transform those dreams into reality. Seek out challenges that push you out of your comfort zone, for it is through these experiences that you will grow, evolve, and emerge as leaders who can make a profound impact on the world. As you embark on the next chapter of your lives, remember that true leaders are not defined by their successes alone, but by their capacity to learn from failures and never give up. Your journey may not always be smooth; you will have your share of disappointments and moments of glory. Both have to be handled with due diligence.

Furthermore, always remember the importance of respecting and valuing the wisdom and experience of the elders in the family and wise in the society. The human connect and mentorship they offer can shape your journey, providing invaluable insights that will stay with you for a lifetime. Cultivate relationships built on trust, humility, and a genuine appreciation for the wisdom that comes with age, and which cannot be replaced by digital applications. As you venture forth into the world, armed with knowledge, courage, and a never-give-up attitude, know that the future holds endless possibilities for those who dare to dream, believe, and persist. Your unique talents and leadership potential have the power to reshape our world for the better.

I am honoured to have been a part of your journey, and I am confident that you will go on to achieve remarkable things. Cherish the memories you have created here at Sreenidhi, and carry the values instilled within you as you forge your path ahead.

Aim high and soar higher! All the best and Godspeed!

## A Message from our DP Coordinator

**Sreedevi Varakavi**  
DP Coordinator

Proud Journey, Future Success!

Dear Students,

As we mark the end of your journey with us, I want to take a moment to reflect on the incredible progress you have made over the past two years. From the very beginning, when you made those crucial subject choices, to the completion of your internal assessments and the formulation of research questions for your Extended Essays, you have shown immense dedication and perseverance. It is with great pride that I look back on these moments and witness your growth.

I want to applaud each and every one of you for the unwavering commitment and determination you have displayed throughout this journey. The path you have taken was not always easy, but you have overcome the struggles and embraced the challenges with resilience. You have shown us what it means to be truly dedicated to your education and personal growth.

I would also like to acknowledge the exceptional contribution you have made to the student council. Your leadership skills have been commendable, and I encourage you to continue nurturing these skills as you embark on your future endeavors. Your ability to work collaboratively and make things happen was evident in the successful relaunch of FIESTA, an event that none of us anticipated. This achievement not only showcased your dedication but also fulfilled your CAS requirements. Well done to the entire class for this remarkable accomplishment.

This year, we took a significant step by introducing the Non-Regular Diploma, which was specifically tailored to accommodate students interested in pursuing medicine with a focus on the three sciences. This innovative approach widened the scope of our program and ensured that we catered to the diverse aspirations of our students. I am proud to see our program evolving and adapting to meet individuals needs and interests.

Furthermore, the introduction of open-book exams marked a significant milestone in our assessment methods. This approach emphasizes problem-solving, analytical thinking, and the practical application of knowledge. It encourages a more comprehensive evaluation, reflecting real-world scenarios where access to resources and the ability to apply knowledge are essential. I believe this change will better prepare students for the challenges they would face in higher education and beyond.

As you embark on the next chapter of your lives, remember that you have the skills and knowledge to thrive in any situation. Cherish the memories and friendships you have made during your time here, and never stop pursuing your dreams. You have shown us what it means to be dedicated, resilient, and capable individuals, and I have no doubt that you will continue to make a positive impact in the world.

Wishing you all success and Sreenidhi will be happy to receive you in its lap as best Alumni.

## A Message from our MYP Coordinator

**Tonderai Mutasa**  
MYP Coordinator

As we come to the end of another school year, it is a time to reflect on all that we have accomplished and the progress we have made. This year has been unlike any other, and we are incredibly proud of the resilience and determination that our students have demonstrated throughout.

As the great American writer Maya Angelou once said, "Education is the passport to the future, for tomorrow belongs to those who prepare for it today." Our students have prepared themselves for a bright future by demonstrating high level skills and excelling in different areas of the MYP's Approaches to Learning (ATL) skills, notably: communication, and collaboration

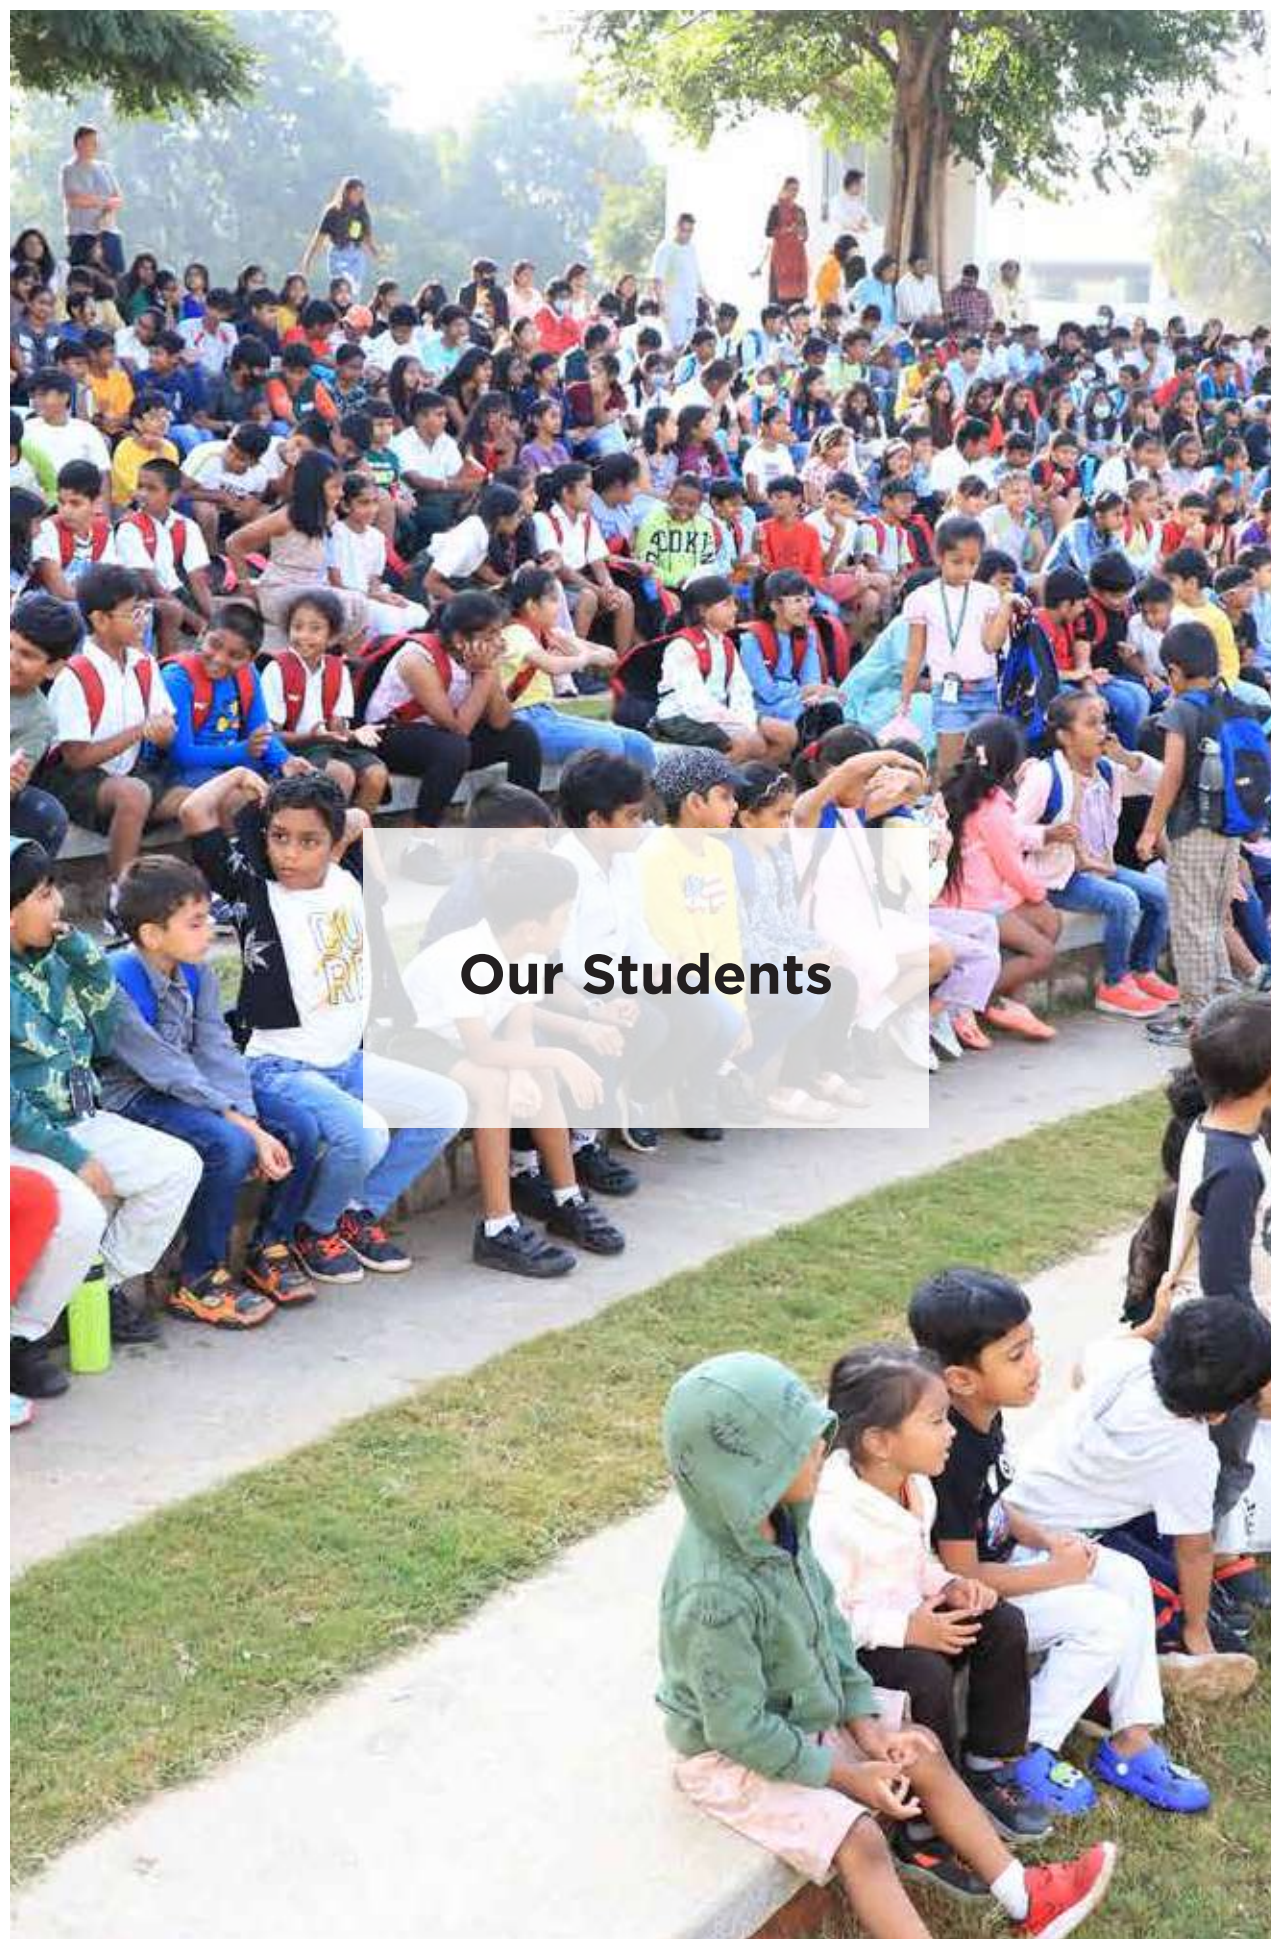

Our students have demonstrated their ability to change the world by engaging in Model United Nations (MUN), a program designed to develop critical thinking, public speaking, and research skills. It was inspiring to see our students engage in meaningful and thought-provoking discussions, and we are excited to continue this program in the years to come.

The MYP program has also been a highlight this year, with our students engaging in a range of interdisciplinary projects that encourage them to think critically and creatively. As Albert Einstein once said, "Imagination is more important than knowledge. For knowledge is limited, whereas imagination embraces the entire world, stimulating progress, giving birth to evolution." Our students have shown impressive imagination and creativity in their personal projects, tackling a diverse range of topics and producing impressive outcomes.

As we look back on this year, we are filled with pride and gratitude for our students, who have shown remarkable resilience and dedication in the face of unprecedented challenges. As the great philosopher Aristotle once said, "Educating the mind without educating the heart is no education at all." We are grateful to our teachers and staff, who have not only provided a high-quality education, but have also supported our students' emotional and social well-being.

As we move forward, we are excited to continue on this journey of learning and growth, and we look forward to seeing all that our students will accomplish in the years to come. As the American poet Maya Angelou once said, "I've learned that people will forget what you said, people will forget what you did, but people will never forget how you made them feel." We hope that our students will always feel supported and inspired to pursue their dreams and make a positive impact on the world.

## School Year In-Rewind 2023

## Independence Day and Investiture Ceremony

From enthralling dance performances and skits to the investing of the new members of the Student Council, the Independence Day celebration at Sreenidhi was particularly memorable in 2022. The day began with the unfurling of the tricolor. This was followed by a series of cultural activities which featured enthusiastic dance performances, song recitals, and skits by students. By demonstrating the core Indian values, they successfully sparked a sense of unity and patriotism among members of the community.

Fittingly, this day also featured house cheers which served as a way to reinforce the student body's house spirit with great zeal and continue the pursuit for the Crystal Cup. The celebrations concluded with the Investiture Ceremony, where the newly elected Student Council members were vested with their badges and sashes to mark the beginning of their roles as leaders and advocates for the student body. They collectively pledged their commitment to work towards the betterment of the school community and were met with energetic applause. All in all, this day was filled with pride, solidarity, and gratitude – some of the values which each of us should strive to uphold as members of the Sreenidhi community.

## Science Fair

The excitement was palpable as the Sreenidhi community geared up for its first-ever science fair set to take place on September 17th. But, just as preparations were in full swing, a curveball was thrown in the form of a government mandate declaring the 17th as a statewide holiday in honor of Telangana Formation Day. Undeterred, the tireless efforts of Mr. Ramakrishna and Ms. Sajala ensured that the fair was rescheduled for the 19th.

The fair was a true showcase of the diversity and talent within the Sreenidhi community, with participants ranging from young students in PYP 5 to older ones in DP 2. The judging panel was also diverse, comprising both students and teachers to provide a well-rounded perspective on the projects. Whether it was a simple project like a DNA model or something more complex like a cloud chamber, everyone could find proposals they were interested in. "I am glad to see that the students are getting opportunities we didn't," said Ms. Neetu (A Science Teacher).

The event was not only a fun and engaging experience for all but also a valuable learning opportunity for the entire school community. "We thoroughly enjoyed presenting our science fair project about antibiotic usage and educating our fellow students, parents, and teachers," shared Preethika and Siddharth, two of the winners from the day. With the knowledge and inspiration gained from the science fair, Sreenidhi students are sure to continue reaching new heights in their scientific pursuits.

## Science Fair

## Dussehra Celebrations

Sreenidhi celebrated Dussehra'22 with lots of pomp and joy. From EYP to DP, students across grade levels looked forward to the day weeks in advance. While the elder kids dressed up in their best traditional outfits to participate in an art competition and play fun rounds of dandiya, the younger ones watched a movie with popcorn in their classrooms. The energy was exhilarating; the air on campus seemed a little sweeter and a lot more special than usual!

Staff and faculty joined in as well, and their enthusiasm had all our blood pumping. The highlight was perhaps the spontaneous singing in the lunch hall—where everyone joined in to sing Ilahi together—or maybe, it was celebrating with the football team from SDFC. Either way, it was a day that will be remembered for many years to come; according to Wellness Secretary Anshula Tiwari, "It was one of the most fun days of the term!"

## Children's Day Celebrations

## Teacher's Day Celebrations

## Spirit Week

One of the most fun aspects of halloween for children worldwide is the dressing up, and trick or treating for candy. Sreenidhians are no different. The student council ensured student's amusement throughout the week of Halloween, leading up to the MUN by organizing a spirit week, during which they could dress up according to the theme given. This was a great opportunity for houses to rack up their points while also having a fun time.

The first day of spirit week was on the day of Halloween. On this day, students could attend classes wearing any Halloween costume of their liking. Sreenidhians were encouraged to be their spookiest, whether it be a zombie, vampire, or a witch, and were rewarded during the day with candy through trick or treating. The second day was T.V. Tuesday, during which students dressed up as their favorite TV show or movie characters to show their enthusiasm for their favorite form of media. Characters such as “The Plastics” from Mean Girls, and enchanting Disney princesses were seen, showing off students’ movies and T.V. show knowledge. Following traditions, the third day of spirit week was used in order for students to show their enthusiasm for their houses. Bright house colors were everywhere, showcasing everyone’s devotion to their respective houses, and working towards winning the crystal cup. The fourth day was unique, with the theme being opposite day, it was up for interpretation. With a massive range of different outfits, students were seen wearing socks on their hands or wearing clothes often associated with the opposite gender. The fifth, and final day of spirit week was used as a segue into the MUN conferences taking place later that day. Throughout the school day, Sreenidhians were seen wearing everything, from comfortable and cozy pajamas to three piece suits.

When asked about her experiences with spirit week, Naina, a MYP student responded “It was a fun way for everyone to express themselves while also gaining house points!” In a nutshell, spirit week was an enjoyable event for students to destress and participate to help form lasting memories with the school community.

## Spirit Week

## MUN 2023

After a three year wait, Sreenidhi MUN was back on campus: bigger and better than ever! Registrations increased tenfold, executive board members with decades of experience from all around India attended, and pressing global issues were fiercely debated on by the next generation of humanity. And what did it take? A tightly knit team of over 40 individuals who worked day and night to organize something we've never done before: a Model UN here at Sreenidhi with almost 500 people attending. Not only did this team have to organize debates for delegates, but they had to ensure the latter received carefully designed delegate kits, a series of emails, exciting awards, a pool of cash prizes, and well-earned certificates they never gave. And this had to happen all within a short weekend here on campus. "Working with this immensely talented team has been an unforgettable experience. All of it was just so much fun, I wish it never ended," says Manasvi Adusumilli, the Secretary General of the conference. Each secretariat shares its memories—from the short meeting that turned into a five hour discussion of what to fix after Day 1, to pulling off Homecoming with only a week of solid planning, or spending the morning hauling water bottles into every committee room.

Whether you were in ECOSOC with Ansh's hilarious jokes, HRC with Timothy telling you it was his 'last' conference, or INTERPOL with the unforgettable confessions, you were a part of one of the most eventful weekends this year at Sreenidhi. "I had really low expectations due to the previous MUN's, but this was on par with some of the best conferences," shared Tarun, an EB member. Sreenidhi MUN will undoubtedly grow larger in scale in the future, while never failing to leave an indelible mark on all who participated and organized the event.

## Sankranti Celebrations and Gratitude Drive

The school was bursting with vibrant colors as students walked in – clothed in their finest traditionals and wearing huge smiles on their faces. It was time to celebrate a festival like no other: Sankranti. The day started off with an intriguing and inspiring assembly by the MYP 3 students, which began with a play and dance revolving around themes of gratitude and selflessness. “Wow, this is really bringing out the hidden actors in our school,” Arnab, a MYP student, claimed as he listened to the students’ amusing accents and show-stopping performance.

This led the day on to the gratitude drive. From providing us with a clean learning environment to taking care of our fields, the support staff bring so much joy and satisfaction into the students' lives. Now, it was our turn to give back. The drive was a thoughtful token of thankfulness where the students, parents, and staff came together to provide the kind-hearted support staff with sweet boxes and cozy blankets. "The smiles on the staff's faces made my day," said Hammad, a DP student.

## Fiesta 2022

## Wild West!

Having been away for two long years, Sreenidhi's Fiesta was finally back! The theme for the 2022 fiesta was the Wild West, and it was truly an event of the year. Aditi, the Head of Logistics, shared: "Sometimes, we would stay in school until the late evenings just to work on the props.", it would be an understatement to say this paid off as the ambience was elevated by various props such as a jail cell and wanted posters. For the younger audience several engaging activities such as a bouncy castle and a mechanical bull were available. The older audience had the opportunity to participate in numerous competitions such as football and basketball tournaments, band, dance, and fashion shows.

One aspect that brought people of all ages together was the food. From noodles and rolls to pizzas and shakes, there was a wide range of options to choose from. Moreover, Fiesta was not just about fun and entertainment, it had a deeper purpose. The funds raised through the event were used to help local schools with initiatives ranging from window repairs, to construction of gender-specific washrooms. Despite some minor obstacles, the overall progress was smooth. “Our planning was extremely rushed, and highly stressful as we found out only a month in advance.” says Shraddha, the Head of Social Media. Despite the struggles, the organizing team worked hard to ensure it was a fulfilling experience that not only brought joy but also made a positive impact on the community.

## Annual Day 2022

Annual day, an event where actors, musicians, dancers, artists and leaders all come together to put on the performance of a lifetime. As a yearly tradition at Sreenidhi, this year's production did not disappoint. The theme of the play was Sagacity, a folk tale that explores human compassion amongst communities. By using the element of magical glasses, the underlying roots of social greed were magnificently portrayed. "The performers on stage reminded me of why I started and how I started. They helped me reminisce the love I have for performance", said the chief guest Mr. Santosh Sobhan, a Sreenidhi alumni. Although the message conveyed was a serious one, the performance had its fair share of funny moments that spurred laughter amongst the audience. From Mr. Malcolm's attempts at being spooky to the lively characters on stage, the show kept everyone glued to their seats. Overall, this event was a true celebration of the school community's talents and will be remembered for a long time to come.

### Football

## Honor Roll

Academic excellence is a highly valued achievement at Sreenidhi. The school's honor roll is a testament to the hard work and dedication of the students; it happens once every term with different levels of achievement that are each based off of a student's grades. This year's honor roll events were highly successful; with students, parents, and faculty all attending the event. The event was full of lively dances, speeches and house spirit that started the year off on the right foot. "The honor roll was a great event and all the students greatly appreciated the time put in by the faculty to celebrate their efforts" - Saketh Yellinedi, an MYP/DP student.

# Crystal Cup and Sports Day

Sports day was a booming success at Sreenidhi! One of the most important traditions at school, sports day is a day where the entire student body comes together to compete for the crystal cup. The energy was palpable throughout the day, with students participating in a wide array of activities. The morning began with athletic events, ranging from 100m races to relays. They then distributed awards for sports achievers and medals for the winners. It was truly a display of the immense talent present within our student body. After this, houses were given an opportunity to participate in team games. Even parents got involved here, with a teachers vs parents tug of war. It was definitely a memorable part of the whole day and gave everyone present a chance to rack up some last-minute house points. Finally, once all of the events were over, the moment everyone was waiting for arrived. The announcement of the crystal cup winner! The buzz of anticipation was audible as the sports captain took the stage and the results were announced. Coming in 4th place was Jupiter house! Third, Venus house! And.. in a close second was Mars house! That meant, Neptune house won first place! The joy of the students was unmatched as they rushed the stage and accepted the coveted trophy. All in all, sports day was a wonderful celebration of sportsmanship and team spirit at Sreenidhi.

Neptune House: First Place

Mars House: Second Place

Venus House: Third Place

Jupiter House: Fourth Place

"3:22 - 3:32: Long story short, it was a bad time. Long story short, I survived." - Taylor Swift

**Saranya Manyam**

Isn't it funny how day by day nothing changes but when you look back everything changes and now I have some amazing memories.

## Messages from Teachers

**Mr. Gopi**  
(Maths)

I wish you the very best for your next level of academic success. I had so much fun being your teacher and enjoyed the classes throughout our journey and wishing you all the very best in your future.

**Ms. Susmitha**  
(Computer Science)

Why did the computer go to the doctor? Because it had a virus!"

Congratulations, graduates!

I hope this joke brought a smile to your face! Remember to take time to enjoy the little things in life and never be afraid to laugh at yourself. Laughter is a great way to relieve stress and boost your mood, so keep those jokes coming!

You've made it through high school and now it's time to celebrate your hard work and accomplishments. As you move forward into the next phase of your life, don't forget to embrace your sense of humor and find joy in the little things. Life can be tough at times, but a good laugh can make all the difference. So keep smiling, keep laughing, and remember that with a positive attitude, anything is possible. Best of luck on your future endeavors!

**Ms. Urska**  
(TOK)

Dear DP2 students, my dearest TOK batch, The last to use ChatGPT without a catch!

A diverse bunch with souls so deep, Deadlines may slip, but the insights you keep :P I'll miss our chats, our lively debates, Exploring perspectives, biases and traits!

As you move on, may the world bestow Success in all you possibly do, and may it grow and glow and overflow :) The journey ahead may not always be smooth, But keep your groove and don't lose your youth.

Stay true to yourselves, never forget Lessons learned, and the memories set.

Farewell, my dear students, it's time to part, You'll forever hold a special place in my heart!

**Ms. Claudia**  
Business Management

My best wishes will always be with you. Have faith in yourself and your knowledge. Be humble and let your actions speak for you. Education does not stop you from making mistakes but it inspires you to take lessons from your mistakes. Happy farewell dear DP2 students!

For my BM class (Akshaya, Thanvi, SriKaran, Krisha, Ruthvik, Karthikeya and Saranya): Set your goals high and always dream big. You are only as big as the dreams you dare to live.

Best wishes!

"It was fun to teach amazing students like you! I'll miss the moments we spent together. It was fun. These memories would continue to linger in my heart. Soar higher than you have ever done. A big congratulations!! All the best for your higher studies and continue to make us proud. Cheers!"

Dr. Ronald  
Arts

The 2022-23 DP2 batch is THE BEST Diploma group I have had in my career life!!  
  
Always full of ENERGY, POSITIVITY, FOCUSED and FUN to be with!!  
I sincerely wish all of them GREAT SUCCESS in their future plans.

Ms. Yelisette

I'm so proud of the Class of 2023! Some of you have been in Spanish with me for six years! It has been such an amazing chapter of our lives that ends today. I can't wait to see you achieving all your goals in your next journey! Les deseo lo mejor, que sean hombres y mujeres de bien, y que sigan practicando español. Un fuerte abrazo y sigan en contacto :)

Ms. Diana

Thank you for making my first year at this school so memorable. I will miss all our discussions, your random jokes and silly translations. Les c  telettes dans ton visage! I wish you all good things for your future. C'est le d  but du reste de votre vie. F  licitation et Bonne chance!

Mr. Kalyan

Wherever you are. Whatever you do. Be happy and work smarter.  
  
All The Best.

Mr. Rahul

It was a pleasure being a part of your journey. Now when I sit and reflect on our sojourn, I can bet that I learned more than I taught. I wish you a happy, healthy, and prosperous journey ahead.  
  
Keep Smile!!!

### Sohini Badvelu (2021 Alumni)

"Hello! I'm Sohini Badvelu, and I graduated from Sreenidhi in 2021. I am currently pursuing a Double Bachelor's Degree in Business Administration and Psychology from the Singapore Institute of Management in collaboration with the University at Buffalo, The State University of New York. Sreenidhi has played a significant role in my journey so far. I have been a student here from EYP1 to DP2, and yes, it's pretty much the only school I have been to. It helped me become the person I am, gave me the closest friends and so many memories that I will always hold close to my heart. The feeling of home, the nurturing environment, people with big smiles, and the immense amount of warmth it radiates, are some things I truly miss about Sreenidhi. Even though I am fairly new to the "adulting" and university world myself, there are two things I would want everyone to know. The first one, as cringe as it sounds, you are going to miss being in school, so please stop stressing, have fun and enjoy it while it lasts. And, the other being, no matter how hard it gets, do not give up on your dreams and goals that you put your heart and mind to. Good luck to all of you in your future endeavors!

### Pranathi Kolla (2021 Alumni)

Hi! I'm Pranathi Kolla, from Sreenidhi's Class of 2021. I went to Sreenidhi all the way from MYP 1 to DP 2, and I can strongly attest that the foundation that our school has laid for me has enabled me to be where I am today- a freshman hoping to continue studying Astrophysics with an intended minor in Data Science at UC Berkeley. Apart from this, I am involved in BareStage (Berkeley's oldest student-run theater group!) and other organizations such as Steminism (a group that teaches elementary students science using instruction kits and simple videos) and the Undergraduate Astronomy Society (a fun group of people- we just chill and talk about space stuff, look through telescopes at cool galaxies and nebulae, watch movies and eat pizza). Though it has been only two years since I graduated, I can say that life is very different- and I miss my years in school so much. Being across the world on my own has thrown me into a new community headfirst- and though it is a struggle to adapt at first, you eventually find your footing and begin to forge your path. The world of university is a sharp contrast to our school community, but taking a step out of the comfort zone I was in enabled me to access the skills I had built throughout all of my years at SIS, and use them as I venture into new prospects- both academically and socially. As for advice, my biggest recommendation is to get as involved as you can in the school community and grasp any opportunities that are accessible to you. Without trying out theater or teaching initiatives at Sreenidhi, I would never have joined the communities that I have here at Berkeley. Think of our school as a comfortable place where you can explore and test-run your interests, and then expand upon them throughout your life. Regardless of what you are interested in, approach initiatives with an open mind, and remember that if you don't try something, you'll never know how you feel about it! It's alright to not be sure of what you want to do in the future or be conflicted between many interests, you'll figure it out, so don't stress yourself out! Don't be afraid of failure- it's a step in the right direction, and it allows you to learn so much through asking questions and improving. Make sure to appreciate every moment you get at school, it's a part of your life that I hope you will all remember as fondly as I do :)

## Alumni Section

### Vidya Golla (2016 Alumni)

I'm Vidya Golla, from Sreenidhi's class of 2016. I am currently a senior at Drexel University in Philadelphia, PA, USA, majoring in Entrepreneurship and minoring in French and Graphic Design. Apart from pursuing my education, I work to explore aspects of visual arts and travel all around the world! From doing a six month internship in Manhattan, New York to studying abroad in Sénégal, West Africa for four months, I would say I'm quite the globetrotter. Additionally, I was also involved in creating brand and content strategy for Sabala Hub, a new entrepreneurship programme for the Telangana Social Welfare Residential Degree Colleges.

Personally, Sreenidhi played a large part in my life, attending this school from PYP 3 to DP 2. One of my favorite parts of being at Sreenidhi, apart from the beautiful campus and all of my friends, is how we were all one big family.

If I had to give advice to you all still in school right now, I would say that, the real world awaits! Don't be scared to ask questions, and explore. In fact, it's better to be curious and open to new knowledge than settle into a comfortable life just now. Don't be afraid to fall on your face! Failing is okay. You will find a way to learn from it and move on. Just remember to take care of yourself during the process. Listen to your body and your mind, and give yourself time to understand yourself.

The world is full of overwhelming things and everyday it gets more complicated! The best consolation you can have is to know yourself. So give yourself time to reflect and evaluate what works for you and what doesn't. Be honest! Other than that... just have fun :D You will love life more if you are able to find joy in everything you do.
